Profile

Leveraging my engineering background, I embraced a career in fullStack Web development, combining my technical skills with new technologies to create dynamic web applications.

Education

Sinhgad College of Engineering Pune, Maharashtra
Jul 2014 — Jul 2018

Jan 2018 — 2023

Preparation For The Civil Services

Courses

Full stack Web Development, Alma Better
Oct 2023 — Oct 2024

Projects:

BookMyShow:

- Reserve movie tickets and access your recent bookings through a modern, adaptive interface.
- Implemented MongoDB for scalable data management, Express.js for backend API development, React.js for building dynamic front-end components, and Node.js for handling server-side processes efficiently.

CryptoDashboard:

- Real-time price charts and exchange rate calculations.
- Dynamic list of top cryptocurrencies by market cap.
- Built with React, Tailwind CSS for styling, and Redux Toolkit for state management.
- Integrated CoinGecko's API for real-time data fetching.

EntertainmentApp:

- User authentication, responsive design, and interactive elements.
- Navigation between Home, Movies, TV Series, and Bookmarked Shows.
- Bookmark management and search functionality for quick content discovery.
- Built with React, Tailwind CSS, Redux Toolkit for state management, TMDB API for data, Node.js, Express.js for the backend, and MongoDB for data storage.
- Tested API endpoints and database interactions using Postman.
